

# How do I set up my mailbox on Mac OS Devices?

There is a useful help video at <https://www.youtube.com/watch?v=ypUUMqpQK4Q>

## Email Account Settings

To use SSL (secure connection, this is recommended) then please use the following settings:

Account type: **IMAP**

### Incoming Mail Server Settings

User Name: **Use your full email address (e.g. enquiries@iklik.co.uk)**

Password: **Use the latest password you have**

Incoming mail server (host name): **imap.stackmail.com**  
(for pop3 accounts use: **pop3.stackmail.com**)

Incoming server port (IMAP): **993** (for pop3 use **995**)

Use the following type of encrypted connection: **SSL**

Authentication type: **Select "Password"**

### Outgoing Mail Server Settings

User Name: **Use your full email address (e.g. enquiries@iklik.co.uk)**

Password: **Use the latest password you have**

Outgoing mail server (host name): **smtp.stackmail.com**

Outgoing server port (SMTP): **465** (or 587)

Use the following type of encrypted connection: **TLS**

Authentication type: **Select "Password"**

**Please Note:**

If you want to use your own domain name (imap.yourdomainname.co.uk and smtp.yourdomainname.co.uk) you will have to unselect the use TLS/SSL options in the IMAP and SMTP.

You will also need to change the port numbers to:  
143 in IMAP & 587 in SMTP
